FOOD CHANGE

Logo Guidelines

Logo Symbolism

The logo concept embodies the platform's essence of facilitating the exchange of products and services between buyers and suppliers within the food industry.

The bold, all-caps font exudes confidence and authority, emphasizing the platform's reliability and efficiency.

Teal and orange colors evoke trust, vibrancy, and energy, reflecting the platform's commitment to transparency and dynamism.

The opposing arrows create an exchange icon, symbolizing our platform's commitment to seamless transactions and collaboration between buyers and suppliers.

Logo Variations

Primary

Icon / Favicon

The primary logo is the main representation of the brand in most situations, serving as the foundation of its visual identity and ensuring consistency across platforms. The icon or favicon is a simplified version of the logo designed for digital platforms, such as web browsers and mobile apps. It serves to maintain brand recognition and consistency in small digital spaces where the full logo may not fit.

Logo Color Variations

Primary Logo

Positive Version

Positive Grayscale Version

Positive Monochromatic Version

Negative Version

Negative Grayscale Version

Negative Monochromatic Version

Different logo color variations exist to ensure adaptability across diverse backgrounds, mediums, and accessibility needs while maintaining brand consistency and visual impact.

Eligibility

70 px

minimum
size online

25 mm

minimum
size online

Exclusion zone

An exclusion zone is established around the logo, safeguarding its readability, with a defined boundary guided by a square. Minimum size specifications for online and offline use maintain the logo's legibility and visual integrity across digital screens and print materials.

Don’ts

Don’t recolor

Don’t distort

Don’t rearrange

Don’t outline

Don’t resize the elements

Don’t blur

Don’t add drop shadow

Don’t use gradient

Don’t remove elements

Don’t use colored strokes

Don’t use similar backgrounds

Don’t use opacity

To maintain the logo's consistent and accurate representation across all media and contexts and prevent unauthorized or inappropriate alterations, it is essential not to change or use the logo in ways contrary to the guidelines provided below.

Background Color

White or light colored background -
positive version

Orange colored background -
orange-on-white version

Teal colored background -
teal-on-white version

Multi colored background -
monochromatic version

Black colored background -
negative version

For grayscale printing -
positive or negative grayscale version

Every logo color variation is designed for specific uses, adapting to various backgrounds and contexts for optimal visibility and brand representation.

Background Imagery

Light background - positive version

Dark background - negative version

Bold color or complicated background - positive version

Every logo color variation is designed for specific uses, adapting to various backgrounds and contexts for optimal visibility and brand representation.

Teal
#0d9aa2

R: 13	C: 80%
G: 154	M: 20%
B: 162	Y: 37%
	K: 1%

Secondary Colors

The primary colors are used as the main palette, ensuring consistency and recognition in the logo and essential brand elements. Secondary colors complement the primary palette, offering flexibility in design for supporting graphics and accents.

Brand Elements

Arrows

Diagonal Rectangles

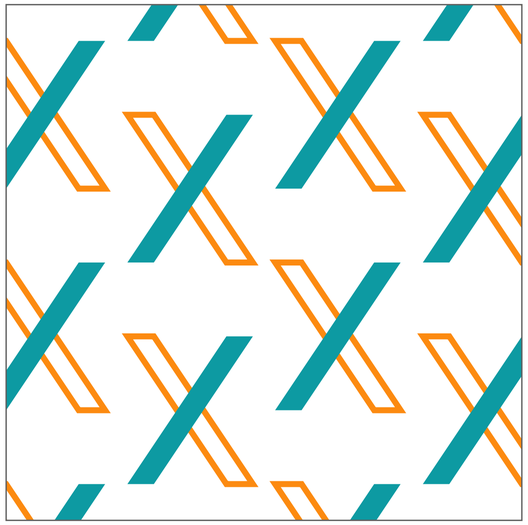
Diagonal Lines

X

Brand elements are the visual components that collectively form a brand's identity and distinguish it from others in the market. Arrows signify growth and direction, embodying our commitment to efficient, reliable, and collaborative exchanges. Rectangles symbolize stability and diagonal lines represent progress. The "X" is not the brand icon, but rather the convergence of opposing diagonal lines.

Patterns

Arrows



X

Diagonal Rectangles

Patterns enhance the visual identity, adding texture and personality to materials like packaging and digital assets, reinforcing brand recognition and creating a cohesive experience.
These same patterns can be used as strokes and lines.
